DIS@Seoul ADR Festival: Wind Farm Disputes – Global Perspectives

Onshore and offshore wind farms are large and notoriously complex projects that involve heavy financial investment and include numerous players at different levels from planning over construction to operation and maintenance. Often contractual parties are committed long-term and require close cooperation to make things work.

Wind farm disputes are a very active area in Germany. However, renewable energy projects are found around the world. The need for renewable energies to meet CO2 reduction targets will trigger a further proliferation of such projects around the globe.

Please join us when we discuss with experienced international panelists some factual and legal challenges of these projects in East Asia, typical dispute resolution mechanisms used – Dispute Adjudication Boards and arbitration – and what the experiences are. Are we all set right on the disputes side?

This event takes place in the framework of the [Seoul ADR Festival 2025](#).

Registration

Please register **by 21 October 2025** via the link below. Participation in the event is free of charge. By registering you accept the [DIS General Terms and Conditions](#) for Conferences and Workshops.
